

CL-CR17

Name: 19Inch RackMount

Overview:

CL-CR 17 Slots rackmount, as a Local Multiservice Transmission Platform, a well-designed solution for telecom carriers to solve problems and requests meted in new network constructing and existing network renovating, can satisfy service needs in edge network with a strong networking ability. it can be installed in the standard 19-inch 4U standard rack, can hold 14 modules and one SNMP NMS Agent module and two power module, every module can work independently, different type of modules can be mixed into the same rack, this system is safe and reliable.

Feature:

- ◆ 19-inch 4U standard rack, can be installed in the cabinet directly, easy to manage and maintain
- ◆ the most capability are 17 modules
- ◆ Support all our products module cards
- ◆ Dual power supplies backup, 220V AC / 48V DC are selectable
- ◆ Completely comply with the requirements of telecom level operations, with average no-failure time more than 50,000 hours
- ◆ Perfect ventilating and heat-emitting design, which ensure the operation of the syste

Specification:

1. Power
 - AC Input: 100~240V DC Input: -48V
 - Power Consumption: ≤3W
2. Environment
 - Operation Temperature: 0~50
 - Operation Relative Humidity: 20~90%
 - Store Temperature: -20~65
 - Store Relative Humidity: 10~95%

Application:
